

Marina Maier

Full-Stack Developer

Toronto, ON | +1 647-510-9580 | marina.maier.to@gmail.com

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in building responsive, user-friendly applications. Experienced with front-end technologies like React and React Native, combined with back-end development using Node.js and Express.js. Experienced in collaborating in Agile environments and delivering high-quality projects on tight deadlines.

TECHNICAL SKILLS

Frontend Development: React, React Native (Expo), Redux, Next.js, JavaScript (ES6+), TypeScript, HTML5,

CSS3, SASS, Tailwind, Bootstrap

Backend Development: Node.js, Express.js, RESTful APIs, Axios, JSON Web Token (JWT), Knex.js

Databases: MySQL, MongoDB, Vercel-Postgres

Version Control & Collaboration: Git, Bitbucket, Jira, Confluence

Tools & Utilities: VS Code, Postman, GitHub, Figma, Webpack, Resend

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Jan 2025 – Present

Projects: [Acme-Project](#) – Full-stack dashboard app with authentication and PostgreSQL,

[Arcanaguide.com](#) – Bilingual wellness and hypnotherapy site

- Routing, RESTful APIs, and server-side rendering in Next.js
- Form validation with Zod
- User authentication using NextAuth and Bcrypt
- Email integration using Resend
- Responsive UI development with Tailwind CSS
- Deployment and hosting on Vercel

Technologies used: Next.js, Zod, NextAuth, Bcrypt, Typescript, Postgres/Vercel, Tailwind CSS, RESTful API

DAS Systek Inc – Toronto, ON

Associate Software Developer | May 2024 - Dec 2024

Project: BudgetAI – a cross-platform chat GPT like application serving to deliver seamless users interactions with different AIs

- Optimized a responsive UI in React Native, ensuring seamless performance and a consistent user experience across multiple platforms.
- Built RESTful APIs with Node.js and integrated secure user authentication using JWT.
- Managed both MySQL and MongoDB databases, efficiently handling both structured and unstructured data.
- Collaborated with the development

Technologies used: React Native (Expo), Node.js, Express.js, REST APIs, JavaScript, Typescript, MySQL, MongoDB

BrainStation – Toronto, ON

Software Engineering Student | Jan 2024 - Apr 2024

Project: [FemPulse](#) Mood Tracker Web Application – a full-stack application allowing users to track and analyze their mood over time

- Developed a full-stack mood tracker web application, enabling users to track mood trends with visual insights.
- Designed and implemented the front-end using React, integrating interactive features such as React Big Calendar.
- Built the backend with Node.js and Express.js, ensuring secure authentication using JWT and integrating REST APIs.
- Deployed the web application to Netlify, with backend services hosted on Heroku for scalability.

Technologies used: React.js, Node.js, MySQL, REST APIs, JWT, SASS, Heroku, Netlify.

EHN Canada – Toronto, ON

Office Administrator | Sep 2023 - Nov 2023

- Managed office operations and communications, contributing to a smooth-running administrative process.

Moscow State Musical Theatre Helikon-Opera – Russia

Administrative Manager | Oct 2010 - Jun 2022

- Implemented a ticketing system software solution that increased ticket sales by 30%, enhancing operational efficiency.

EDUCATION

BrainStation – Toronto, ON

Software Engineering Certificate | Jan 2024 - Apr 2024

Moscow State Pedagogical University – Moscow, Russia

Master's Degree in Foreign Languages | Oct 2003 - Dec 2011
